

THE  
MOST  
WANTED  
CRYPTO

# REAL WORLD CRIMINAL ASSETS

An innovative **RED NOTICE** project where we connect the crypto world with the real world of crime:

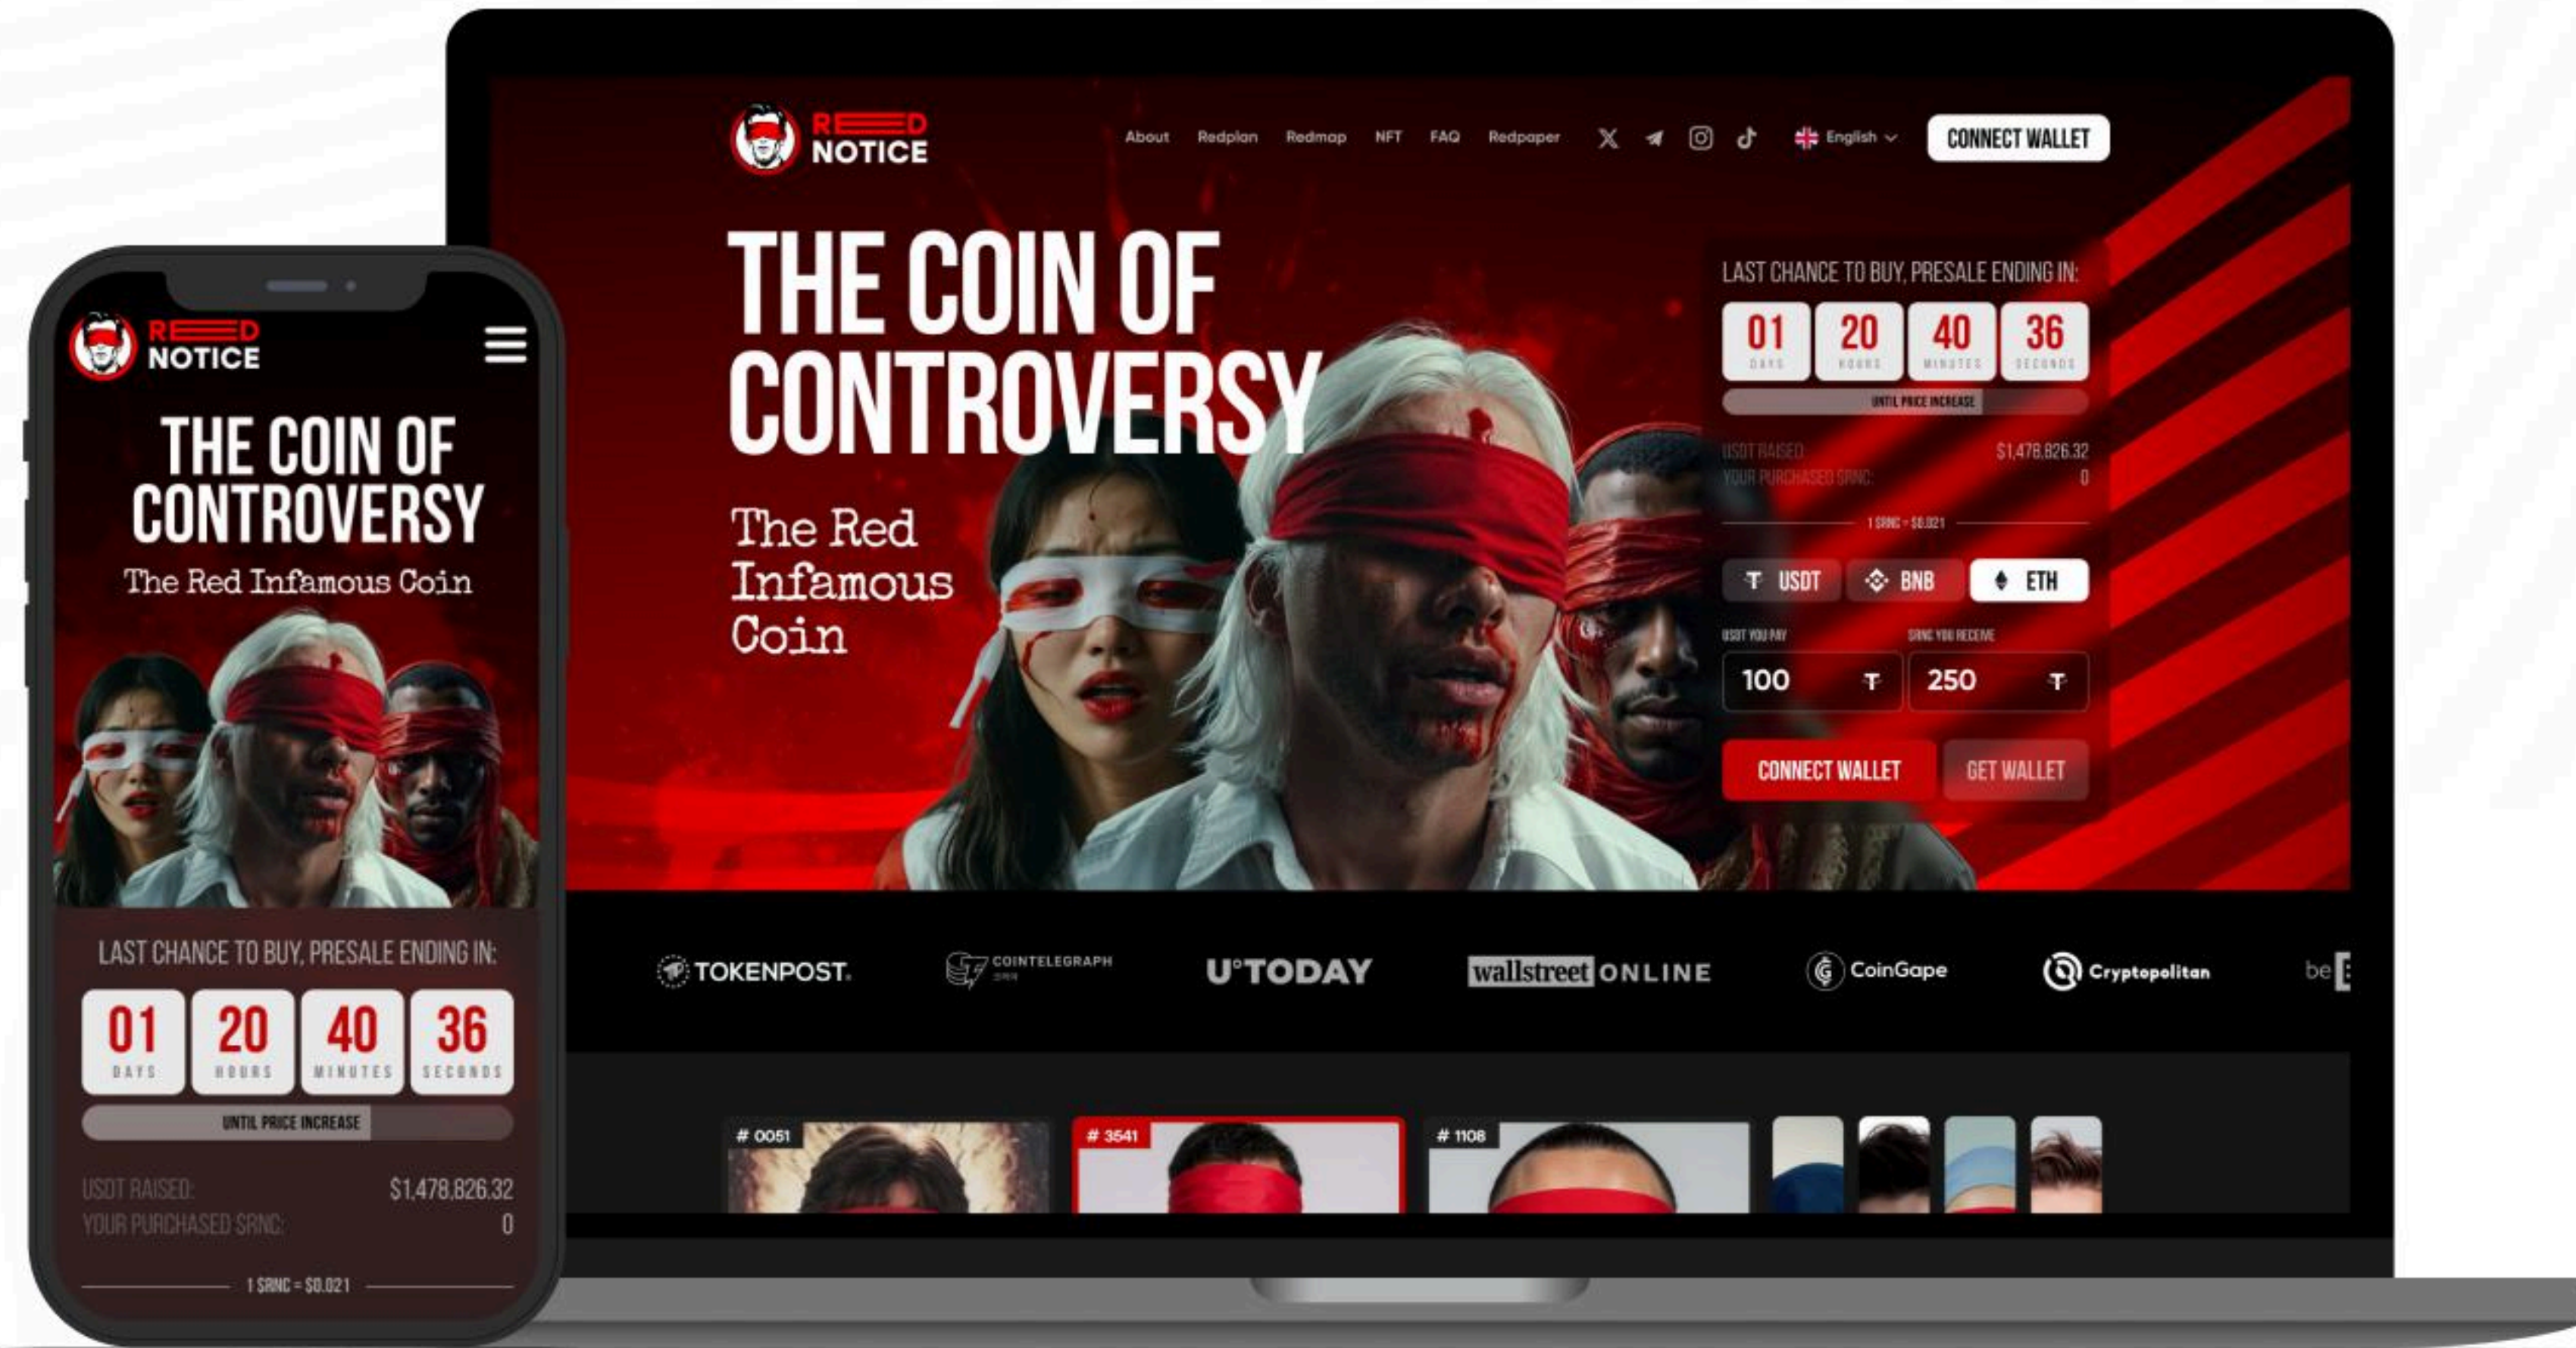

Police from 156 countries report individuals for immediate arrest. INTERPOL publishes their images and data on its website. Our scripts connected to the **INTERPOL** database turn this organization into our **MINE**.

# 6700 Most Wanted People

- **We digitize** and lock in the blockchain 6700 of the **world's most dangerous criminals**, sought by police of all countries.
- **For each real person** wanted by INTERPOL, we generated a **realistic avatar** that is 86% consistent with his appearance.

# Website and Mobile App

# Dangerous Base Tokens

- Each criminal wanted by a RED NOTICE becomes a base token worth 100,000,000 RNC and part of the RED NOTICE project.
- We are introducing **670,000,000,000** Coins into the black market... Sorry, into the RED MARKET...

=

**100 000 000 \$RNC**

# Market Analysis 2024/2025

- The market is and will be bombarded with new MEME coins.
- It is a memecoin cycle for two major reasons:
  - No groundbreaking crypto narrative such as Ethereum & Smart Contracts (2017) or Uniswap & DeFi (2020) appeared
  - Crypto players are tired of VC projects where the founders and backers are constantly dumping on their heads without creating any chances for a financial success.
- **99.9% are junk coins with no chance of any success. 0.01% are coins that bet on originality and HYPE. Because today, HYPE equals success.**

BERLIN. THE SEARCH FOR THOSE INVOLVED  
IN THE RNC PROJECT IS ONGOING.

# Red Notice = Hype

RED NOTICE will be **popular** because it **steps outside the boundaries** of the crypto market. We'll cause such a stir that mainstream media will write about us, not just crypto-themed media.

RED NOTICE will **excite** because it's based on an **extremely controversial idea**, and everyone will want to express their opinion.

RED NOTICE will be **media-worthy** because it will **spark a public debate** about who is behind this project and whether it is ethical.

# Red Tsunami

There's something else...

The **RED** NOTICE project will hit like a tsunami, leaving in the public consciousness that these **6700 human "tokens" live among us.** Is your bar buddy, taxi driver, the smiling old man on the street, or maybe your boyfriend on the list? No, surely not. Or could it be... Now do you understand that people will think about us?

# Just Think!

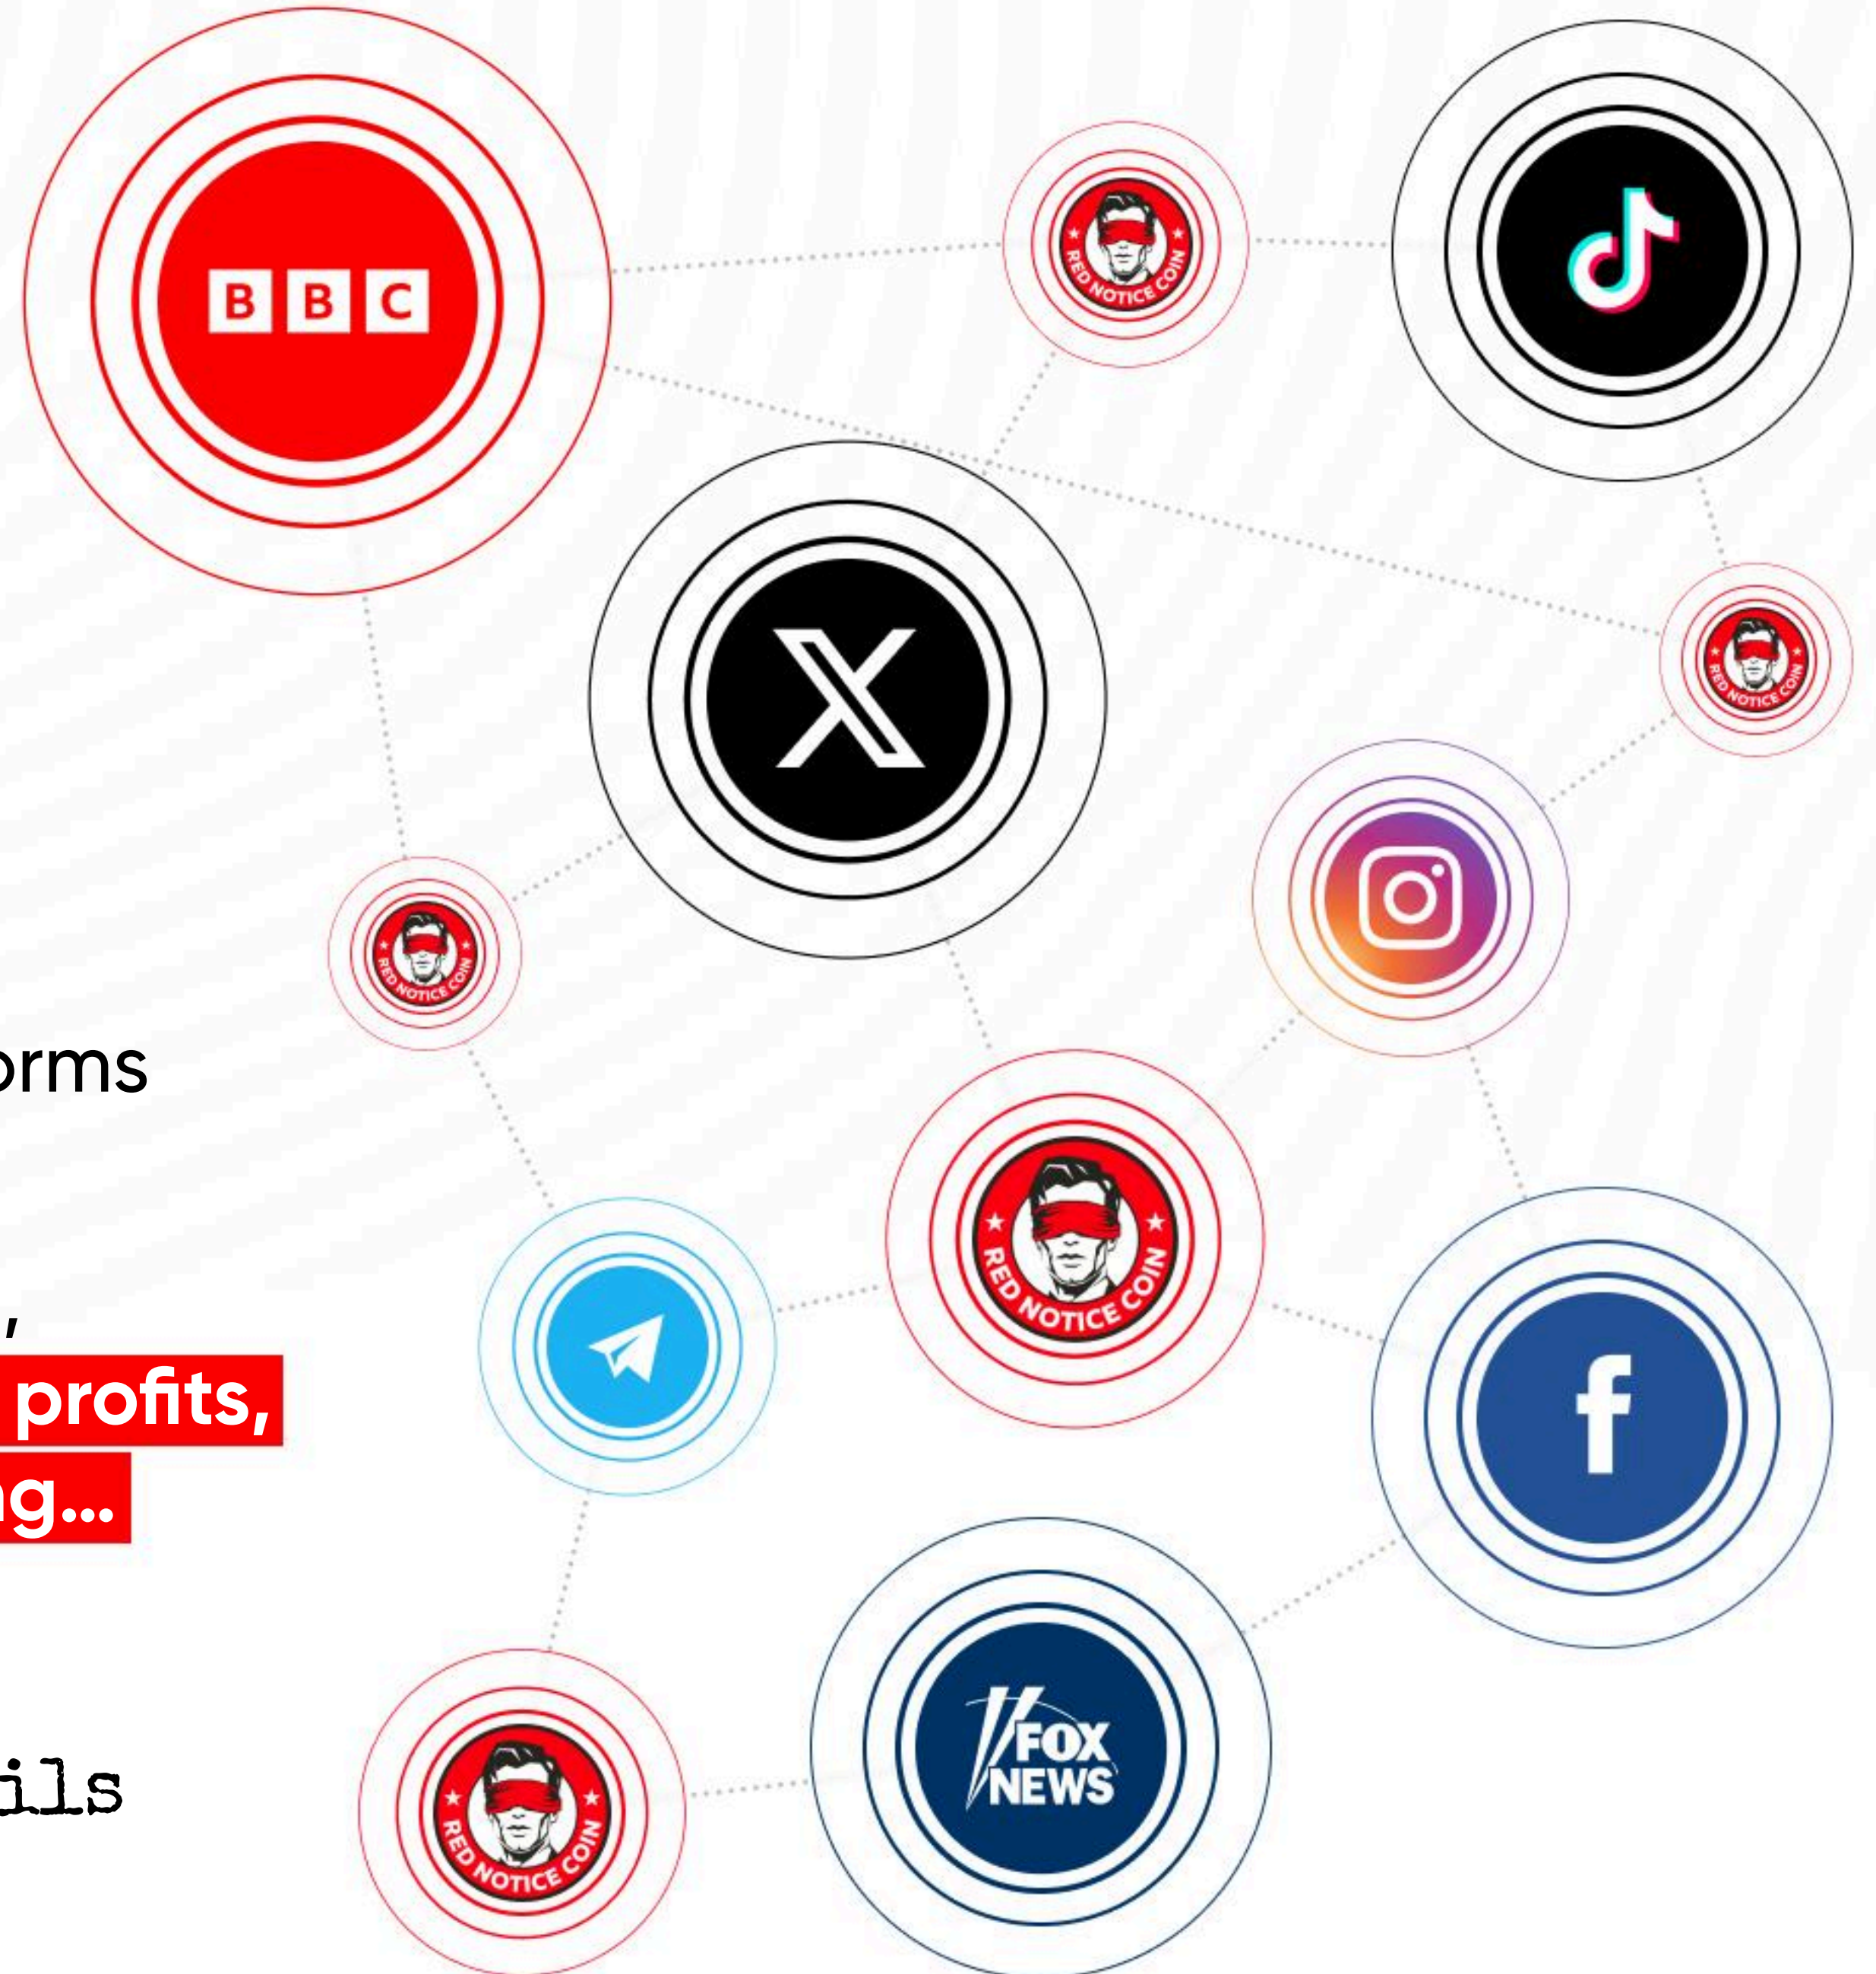

- Do you know any other project that so obviously and directly **connects the real world with data** stored in the blockchain?
- Would you miss out on **RED NOTICE** after such a HYPE, **waiting to see what happens** at the first public listing?

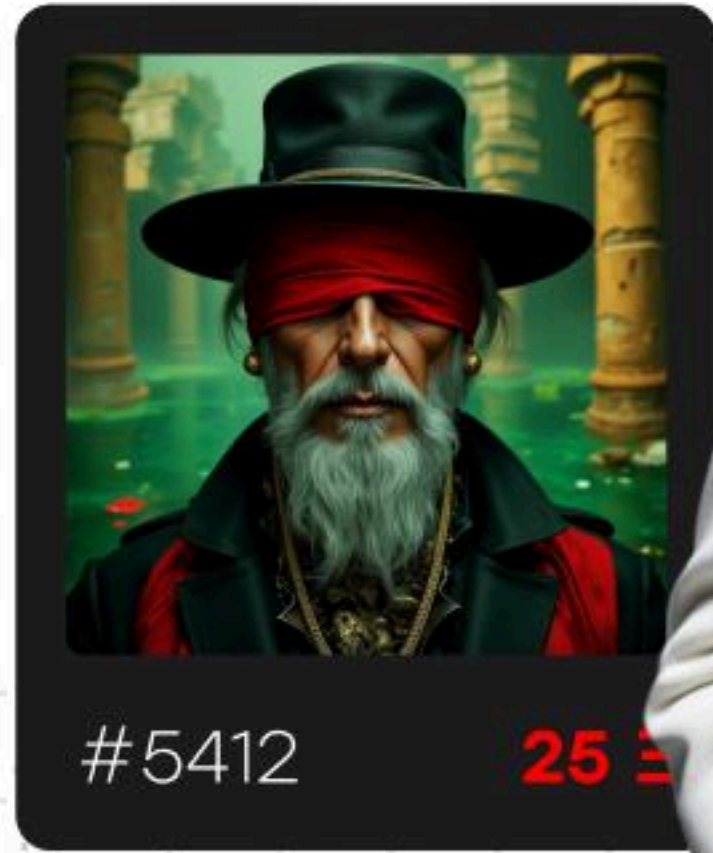

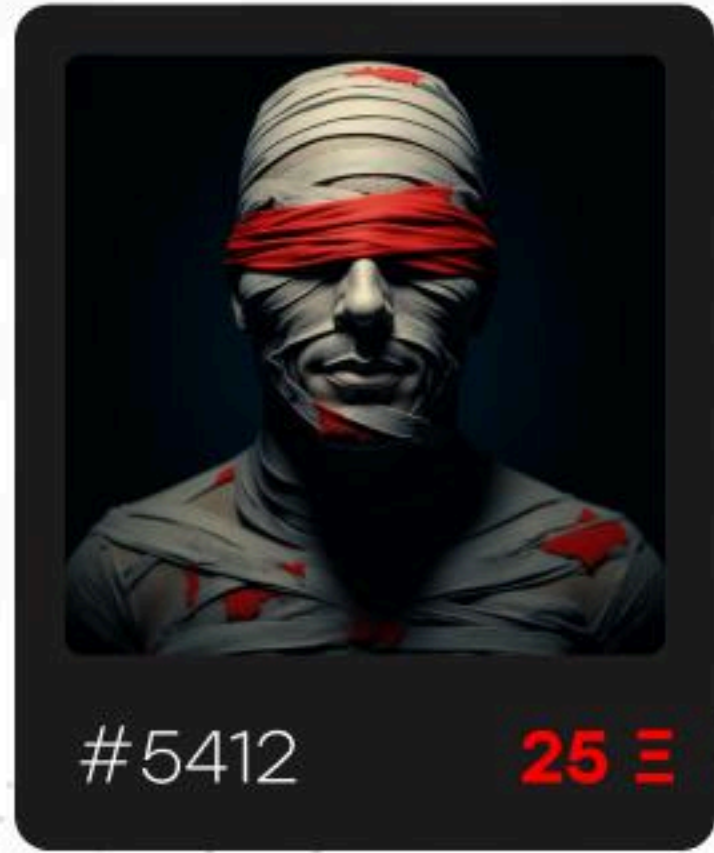

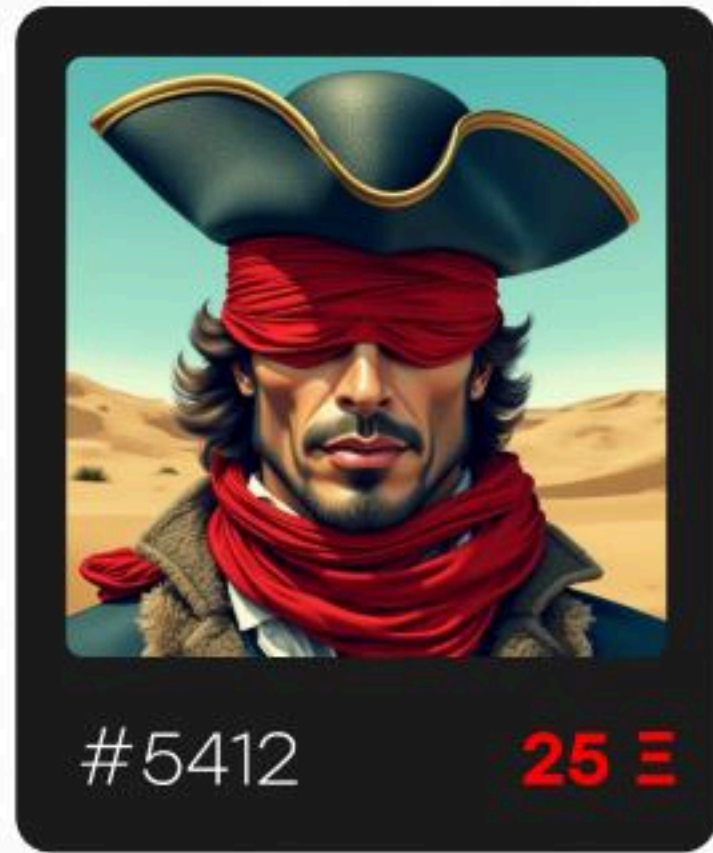

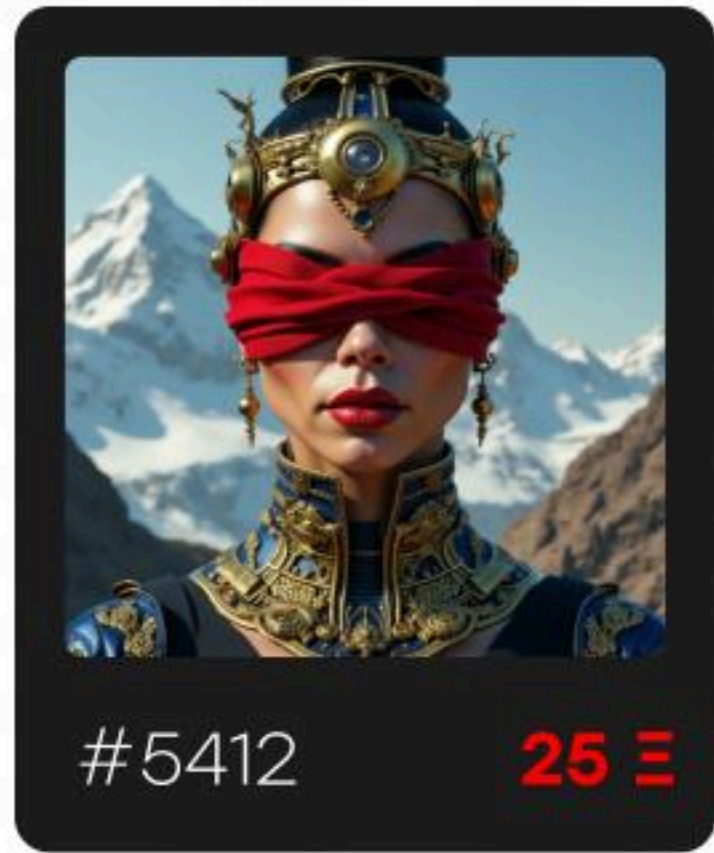

# Our Offer

- A project with a development plan and **real benefits** from owning RNC
- The ability to collect **unique NFTs**
- Our own **fashion brand**
- **Crime channels** on social media platforms and pay-per-view programs
- Plus All that a typical MEME coin offers, namely the possibility of **astronomical profits, fun, participation in something exciting...**

Check out our road map for more details

You can't see  
the truth

# Red Targets

- **Professional investors** who know that such HYPE must bring results in the form of huge increases
- **Cautious investors** who diversify their portfolio and want to include projects with gigantic growth potential
- **Emotional investors** who are excited by the RED NOTICE theme and everything it entails
- **Investors betting** on trendy coins with large media reach

# RED NOTICE

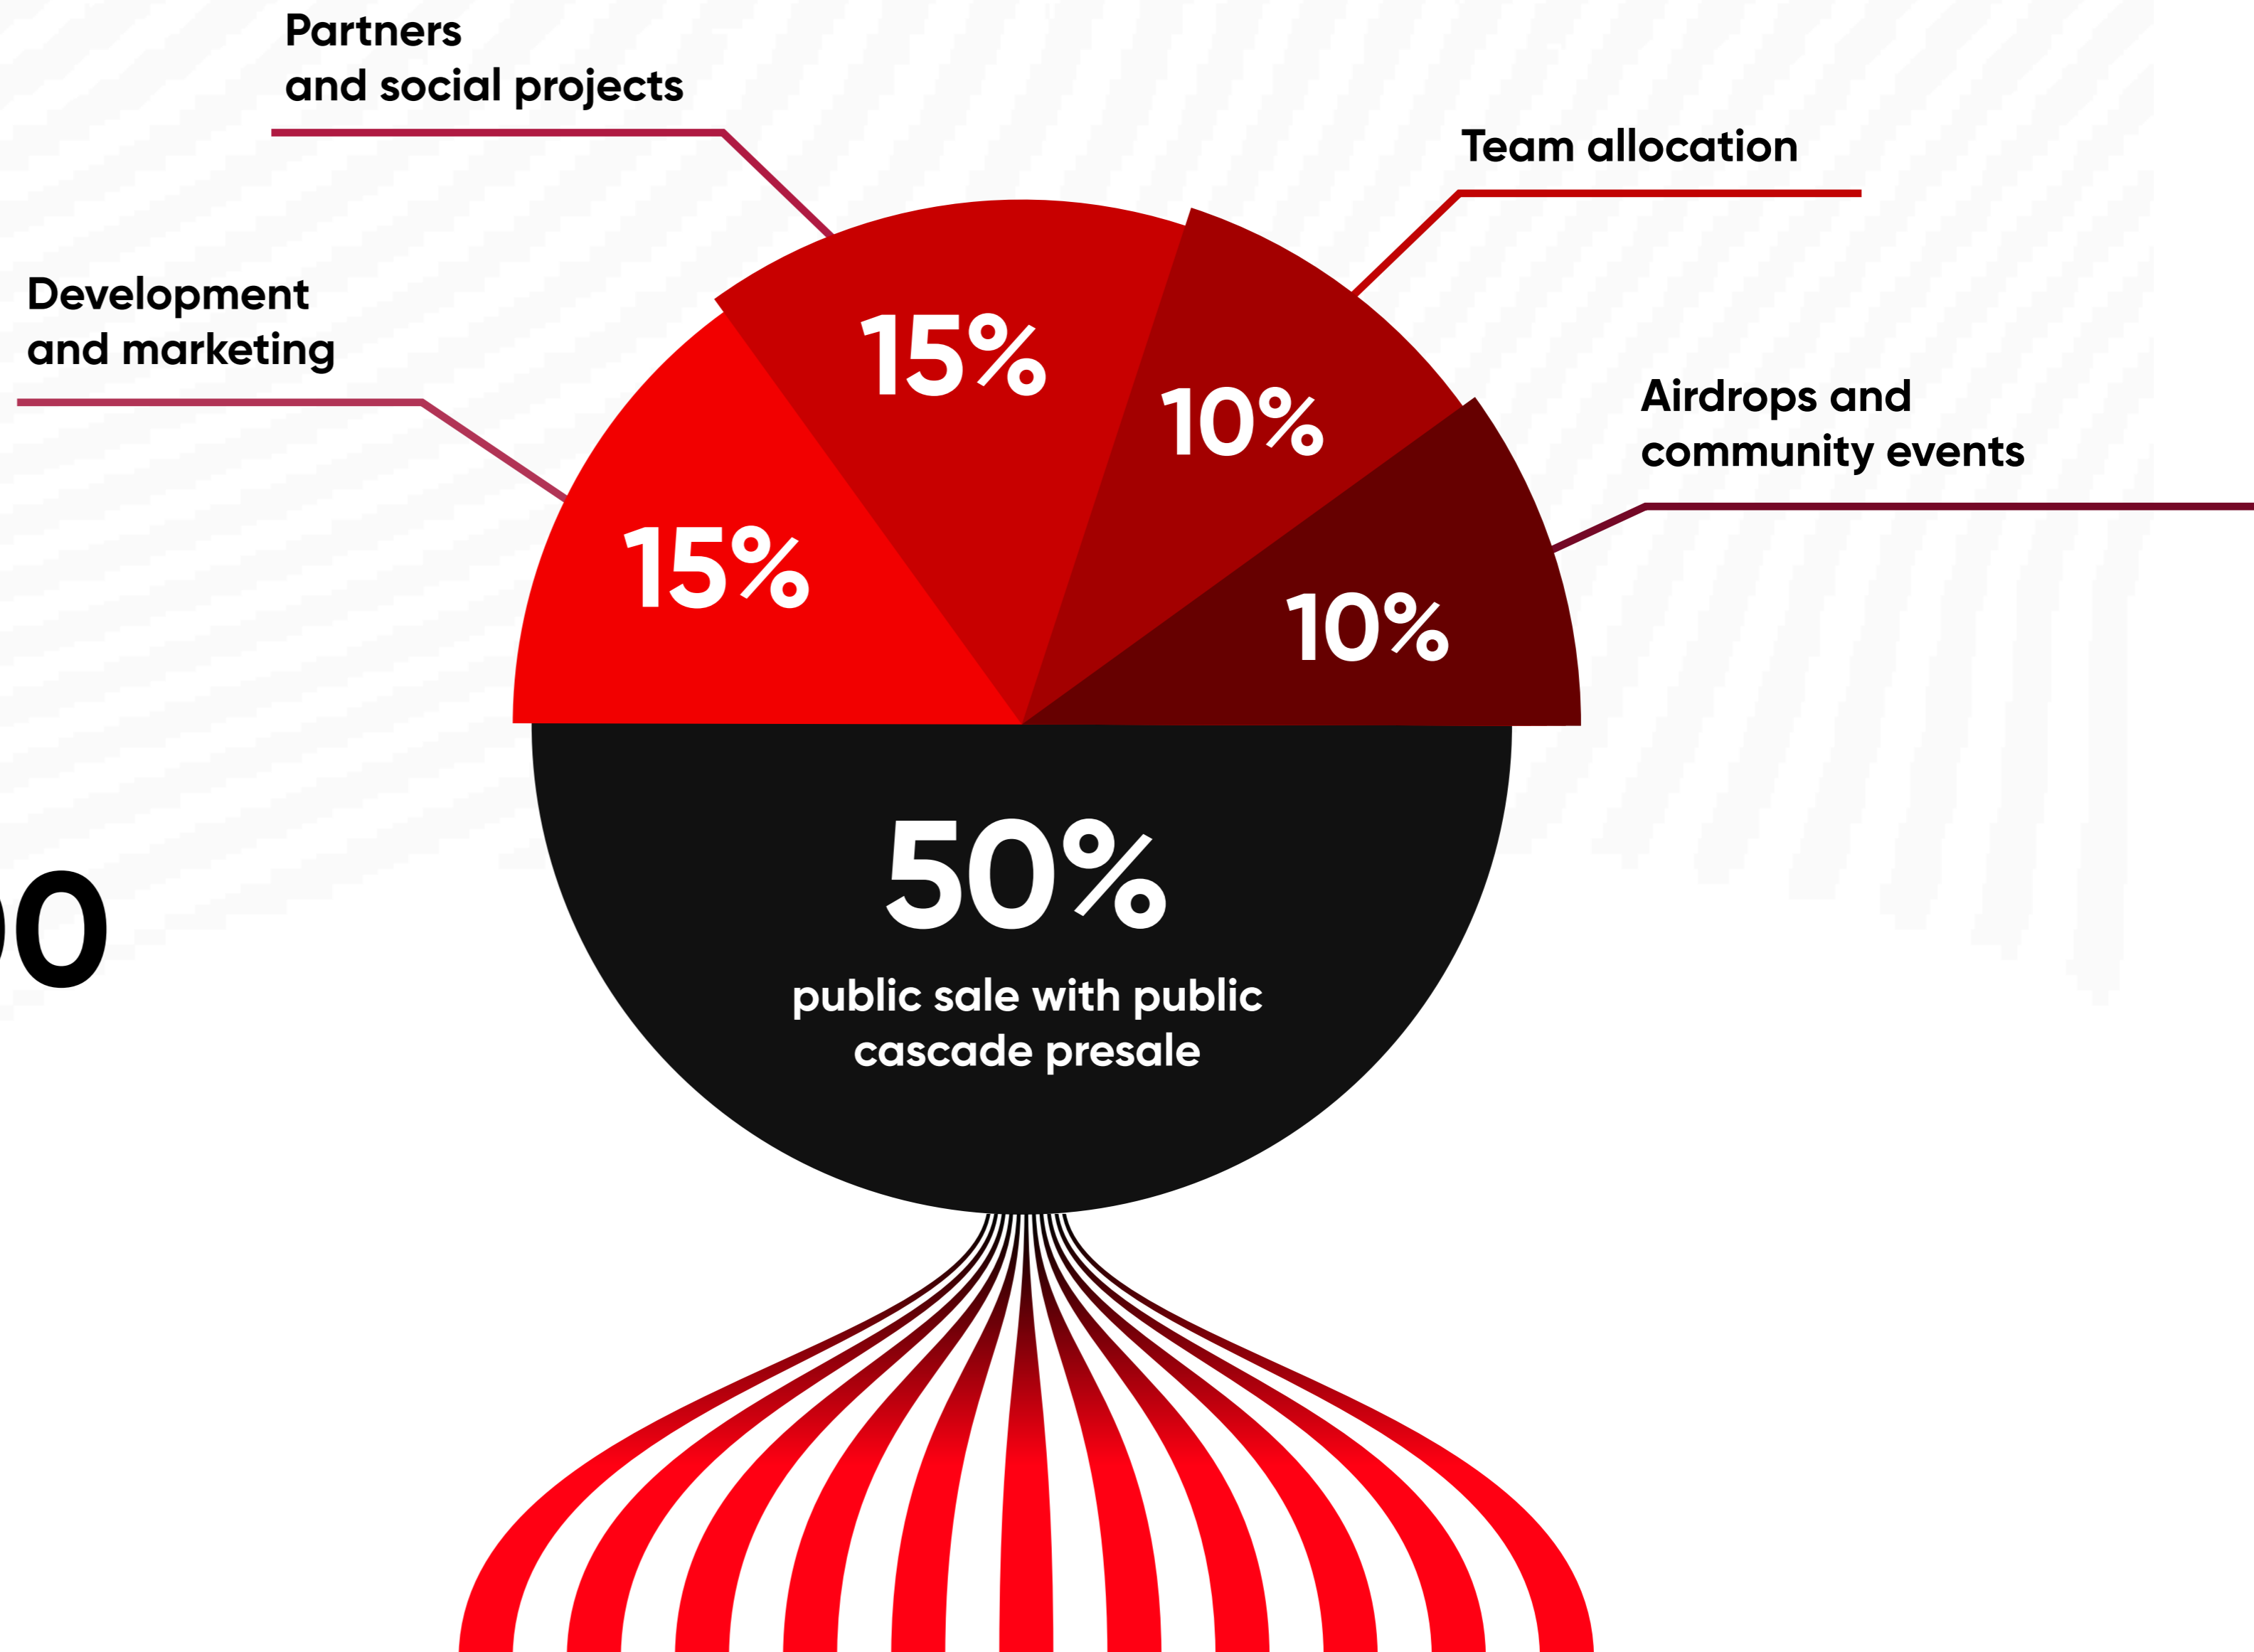

# Tokenomics

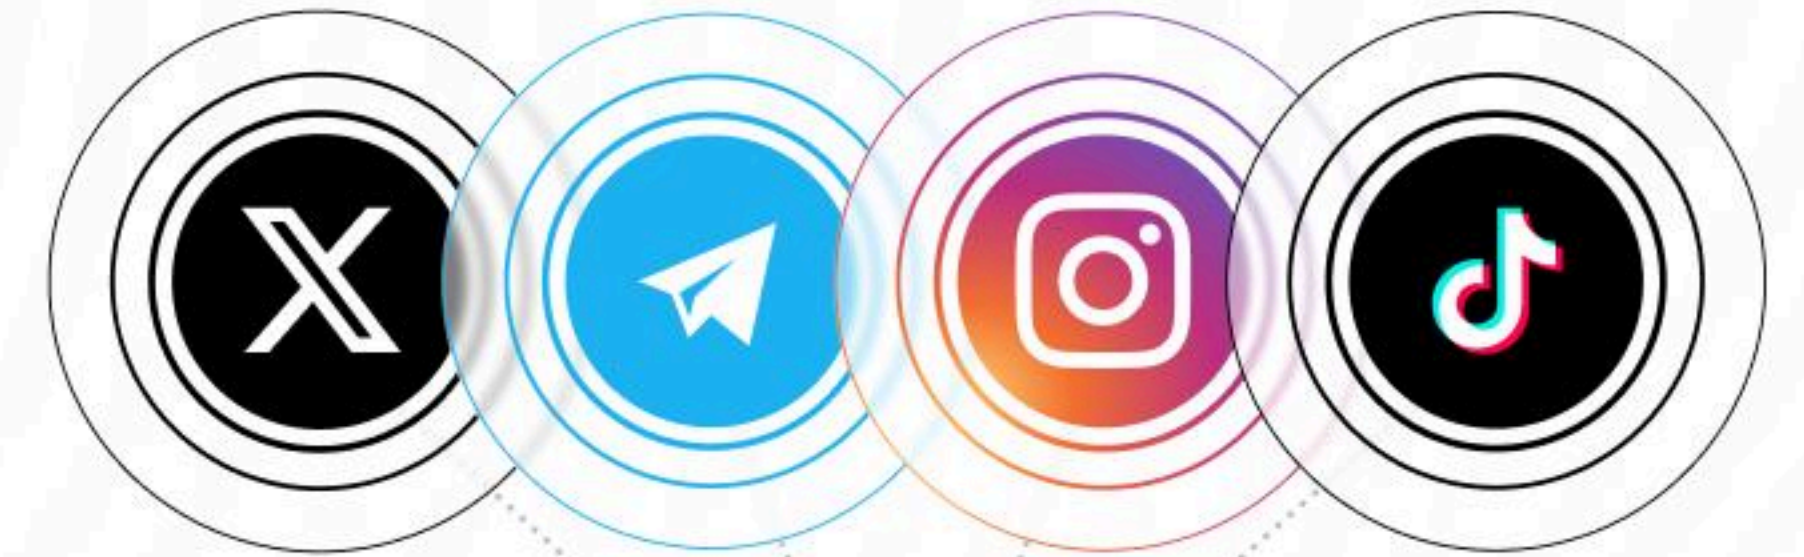

Total Supply:

**670,000,000,000**

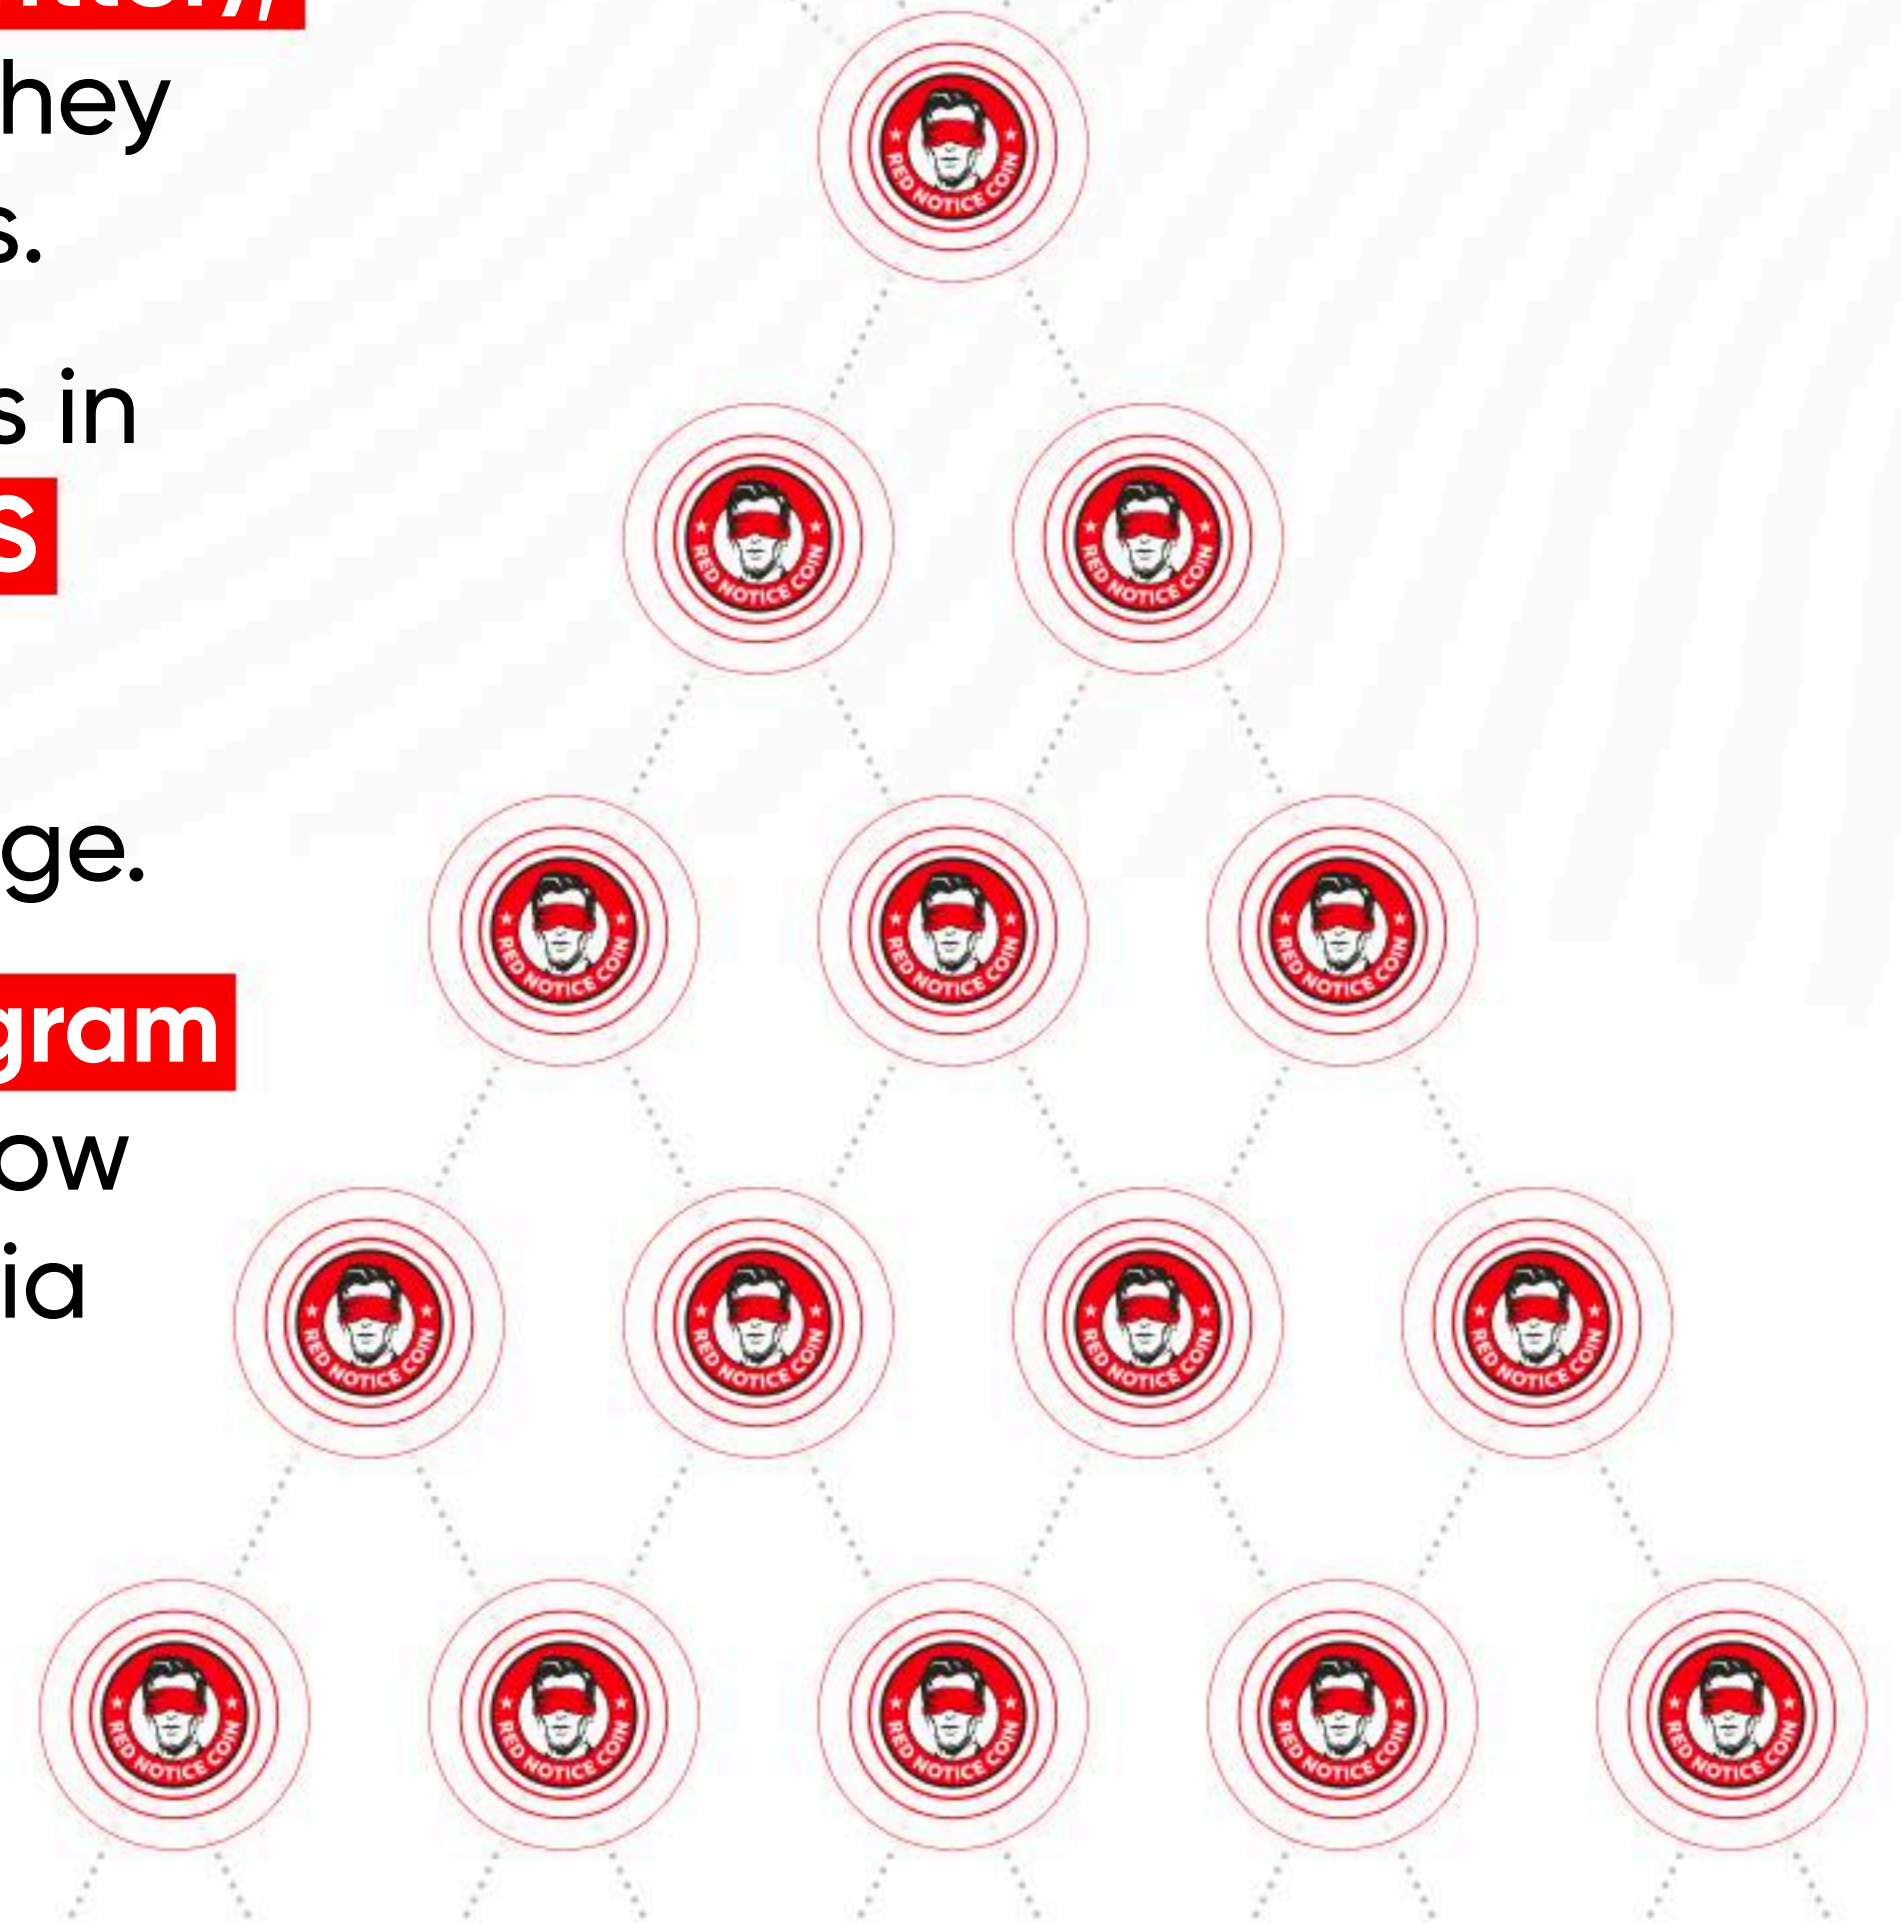

## Coins Distribution:

# Marketing

- A vibrant and active community on platforms **X (Twitter), Instagram, TikTok,** and **Telegram.** Active because they are inspired by rewards for attracting new followers.
- Daily series of dedicated posts and video materials in the form of a studio program **BREAKING RED NEWS**
- Constant **cooperation with selected influencers,** musicians, and celebrities to spread the red message.
- Contests and above all, an **innovative referral program** that will make everyone want to be chased and show themselves with a red blindfold on their social media

# Marketing

- INTERPOL on one side and Pablo Escobar's lawyer on the other will **publicly deny rumors** that they are behind this project
- **First RNC listing** combined with a live broadcast where the project creator will appear and announce the manifesto.
- Collaboration with amateur correspondents who will daily provide us with **unique video materials** related to crime and police work
- Secured partnership with **38 RAP creators,** influencers, and people from the "underground". Initial reach is **480 million content recipients.** And this is just the beginning of the snowball rolling...

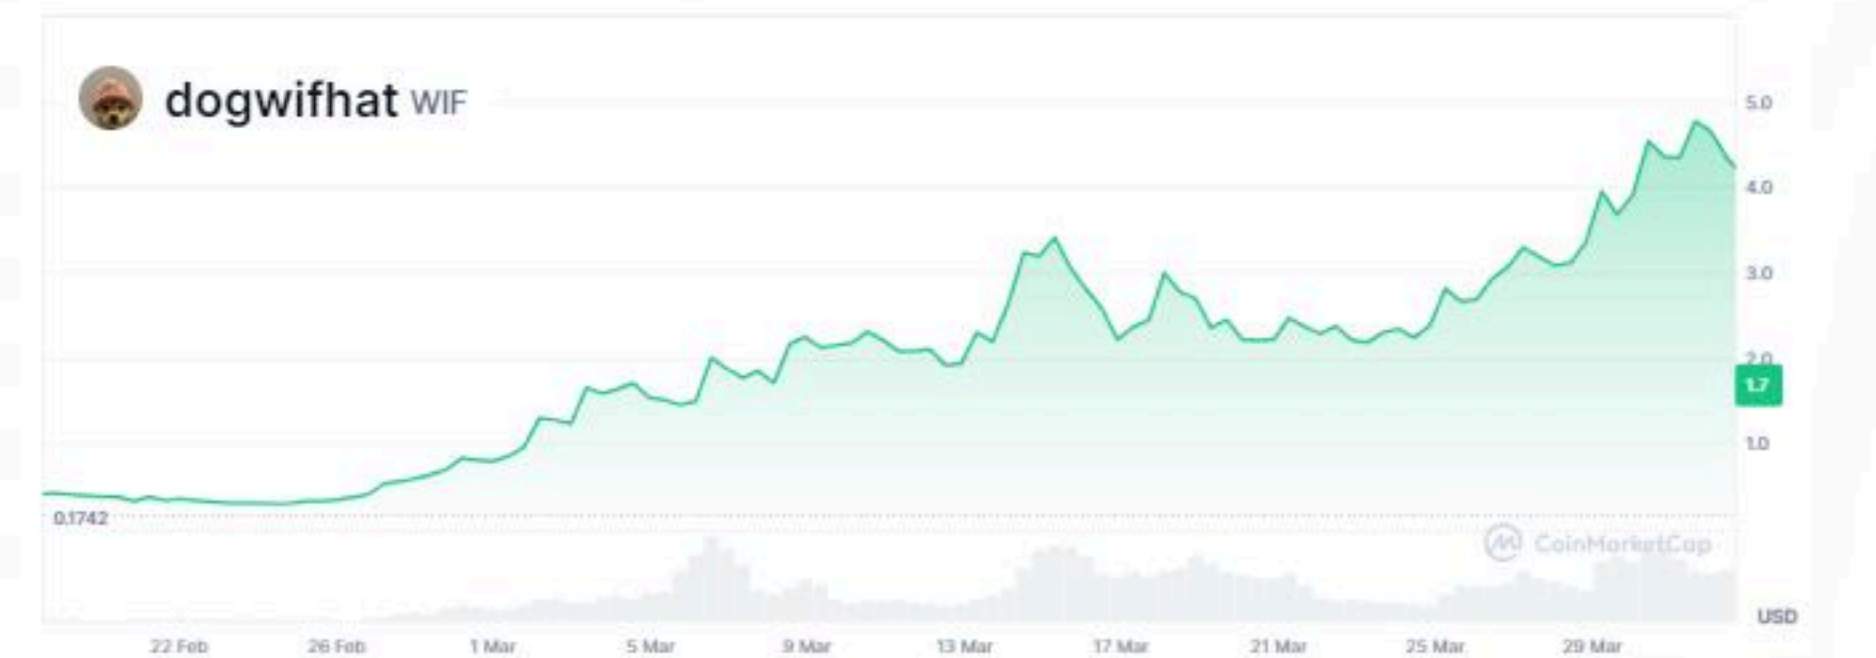

# RED IS BAD?

- **Yes.** We know that **this project will heat everyone** up to redness. We stand by the principle that every person is innocent until proven guilty by a court.
- Courts also make mistakes and **convict innocent people.**
- Global **justice system is not infallible**, look at Julian Assange, Idris Hasan, and others.
- **INTERPOL is criticized** because the police/administrations of some countries report wanted persons to exert pressure on business rivals in civil proceedings or to intimidate political opponents abroad
- Part of the funds obtained from the sale of tokens will be allocated to create a **fund supporting victims of crime** and people wronged by the judicial system.
- **We do not support** or encourage any criminal activities.
- The project has an **entertainment, informational, and educational** character.

# Expectations

- Every forecast will only be a projection of our expectations. We expect large increases because we know the power of marketing, media, and social media. We know how to build **HYPE**. We have a good project for a big **HYPE**.
- Instead of the expected growth forecast for **RED** NOTICE, look at how sample MEME coins have grown, bringing **enormous profits**:
- **Brett**: **7,727.6%** in 2024, as per a report by CoinGecko
- **Dogwifhat (WIF)** also showed impressive growth with a **2,721.2%** increase year-to-date around the same timeframe
- **Pepe** in 2023 grew **1,291,915%** in just one month since launch

# Why this will be an enormous business success?

- Nobody has yet created such an **original coin** so closely tied to the real world. We are paving the way and will reap the benefits of innovation
- You'll see that this season the **most fashionable thing** will be the **red band** over the eyes.
- Familiarize yourself with materials expanding on the issues raised in this presentation:

# Cooperation

We already have our own original rap song and a high-energy music video that capture the essence of our project. Here's a preview – this is more than just music, it's the anthem of a movement

Do you have an original idea for cooperation with us?  
We invite you, but don't bombard us with paid advertising offers.

**You are an influencer, artist, entrepreneur and you want to do something cool with us. Write. Maybe we'll come to an agreement or maybe not, but we definitely guarantee discretion.**

**If you have any other ideas, let us know :)))**

**RED**  
**NOTICE**

Block the noise.  
Focus on **truth**.
